Comment on how the fire service in Lake County can be more cost effective and provide quality service. Duplication in service occurs here in our area as we have a "Closest Unit Response" with the County. We cover county areas to the East, South & West of the City. When a unit responds from Umatilla, the County also responds a unit from the closest County station also. Although sometimes this is beneficial having the additional manpower, the majority of the time, the County unit(s) are not needed. The County needs to contract with the City in these areas. We are covering the area for free and they are receiving the funding. If the funding was provided to the City we could also provide service to the North in the Altoona area. This station is only 3 miles north of our station. This could free up manpower and apparatus for other areas. This would also eliminate the need to build a new station in Altoona.
